6000-2Z/C3

Deep groove ball bearing with seals or shields

Single row deep groove ball bearings with seals or shields are particularly versatile, have low friction and are optimized for low noise and low vibration, which enables high rotational speeds. They accommodate radial and axial loads in both directions, are easy to mount, and require less maintenance than many other bearing types. The integral sealing can significantly prolong bearing service life because it keeps lubricant in the bearings and contaminants out.

- Integral sealing prolongs bearing service life
- Simple, versatile and robust design
- Low friction and high-speed capability
- Accommodate radial and axial loads in both directions
- Require little maintenance

Overview

Dimensions

Bore diameter	10 mm
Outside diameter	26 mm
Width	8 mm

Performance

Basic dynamic load rating	4.75 kN
Basic static load rating	1.96 kN
Reference speed	67 000 r/min
Limiting speed	34 000 r/min
SKF performance class	SKF Explorer

Website experience review

Hello! Your insights matter to us. Help us improve the SKF website by sharing your experience through this usability-focused survey. The survey includes two questions and ten statements, it should take about 5 minutes to complete. Thank you for taking the time to participate!

Next

Properties

Filling slots	Without
Number of rows	1
Locating feature, bearing outer ring	None
Bore type	Cylindrical
Cage	Sheet metal
Matched arrangement	No
Radial internal clearance	C3
Tolerance class	Class P6 (P6)
Material, bearing	Bearing steel
Coating	Without
Sealing	Shield on both sides
Sealing type	Non-contact
Lubricant	Grease
Relubrication feature	Without

Logistics

Product net weight	0.0194 kg
eClass code	23-05-08-01
UNSPSC code	3117
